RESTORE some competition in the computer field. If microsoft shared and played nice with other vendors, OS's, Apps, Languages, Protocols, Standards the computing industry would be better for all, not just one. And to make it worse this ONE has the worst OS, Apps out there. THEY HAVE NO RELIABILITY in their software. So you always have to upgrade...what a joke. PLEASE punish Microsoft and help restore competition to the computer industry and watch technology, innovation really explode !!!

What if it was a secret held by the biggest electric company which wire is "hot" ...????

What if there was a standard (use red), but the big company said "white w/red stripe also" but didn't tell others. I don't know if this example is true but it works. See what Microsoft does?

Shaun
